Profile

Passionate Senior Full-Stack Web Developer with over 8 years professional experience working for creative agencies and a Fin-tech startup. I enjoy working on a project from conception to completion, and am equally at home working with Frontend Javascript frameworks (particularly React and Vue) to developing APIs using Node.js or PHP. In my previous roles, I've been able to effectively self-manage during independent projects, as well as collaborate in a team setting.

Employment History

Senior Web Developer, Contractor

Feb 2021 — Present   ⚲ Berlin, Germany

Having just moved to Berlin, Germany. I'm actively searching for new contracts for after my current contract ends.

Senior Web Developer, Dark Blue Creative ltd

Sep 2017 — Feb 2021   ⚲ Shoreditch, London

Working at a bespoke Web Development Agency as a Senior Full-Stack Web Developer on websites and web apps for a range of clients from established household names to start ups, like: Deliveroo, Mindshare, Ocado, Virgin Care and Secret Escapes.

I had to use different technology on each project, usually jumping between projects depending on deadlines and needs of the client. Tech used includes: Vue (nuxt.js), React (next.js), Laravel, GSAP, Adonis.js, Node.js, AWS, Vercel, Netlify, Wordpress and Sanity.

Some examples of my work while at the agency:

https://careers.secretescapes.com/

https://ocadorisingstarsawards.com/

https://riders.deliveroo.com/en

https://dirtymonster.uk/

https://healthyhospo.com/

Initially in a team of 3 eventually growing to 7.

Web Developer, WMW

Sep 2015 — Sep 2017   ⚲ Clerkenwell, London

Working at an internal communications agency developing websites and web apps for companies such as HSBC, Standard Bank, Camelot (company that runs the UK national lottery), Sony Music and Engie.

Each project required a different skill set, and I often had to balance my time between multiple projects to hit deadlines. Technologies used vary by project, but include: Laravel, Wordpress, Zappar, React, jQuery, Knockout.js and other javascript libraries.

I joined the team as a full-stack mid weight developer and was promoted to the sole senior developer.

Web Developer, SGDA ltd

Jun 2014 — Sep 2015   ♦ Bank, London, UK

Full-stack web developer working for a fintech startup as part of a small team, my role gave me the opportunity to work on a web application used by and demoed to some of the largest financial institutions in the world to access Bond reference data. Working in a high pressure environment to tight deadlines, my duties included:

- Developing fully customised front-end features using Bootstrap and various javascript libraries including jQuery, DHTMLX and Typeahead.js
- Developing back-end solutions in Java using Apache Velocity,Tomcat servlets and Spring framework, under the supervision of a Senior Java Developer
- Managing the MySQL database for the data inputting team
- Developing and maintaining the company website and blog, using Bootstrap, jQuery and Wordpress
- Ensuring that both the web application and company website are compatible across all major browsers, and IE8+
- Managing UAT and demo environments for my Senior Developer
- Acting as technical support for the data inputting team

Web Design Intern, iNeek Digital Creative Agency

Mar 2014 — Jun 2014   ♦ Ealing, London, UK

Working as an intern at a high-street digital creative agency that specialises in web and graphic design. My duties included:

- Designing and Developing websites for our clients, most of whom were small local businesses using Wordpress.
- Creating logos, business cards, leaflets and other forms of print media using Adobe Illustrator and Photoshop.
- Managing the company's, and our clients twitter accounts .
- Customer service tasks, including talking to clients over the phone, communicating with clients over email and creating a welcoming environment for any potential customers who walk through the door.
